

Spring Security

Oauth2 Client Authentication

Configure OAuth2

Add the dependency:

```
<dependency>  
  <groupId>org.springframework.boot</groupId>  
  <artifactId>spring-boot-starter-oauth2-client</artifactId>  
</dependency>
```

Configure the WebSecurityConfig

```
.oauth2Login(oauth2Login ->  
  oauth2Login  
    .failureUrl("/login?error=true")  
    .successHandler(oAuth2SuccessHandler)  
)
```

Third Party Authentication
